Club member Paul Brice is a friend of Justice Laws and suggested we bring him to our club meeting. The information was very interesting and informative.

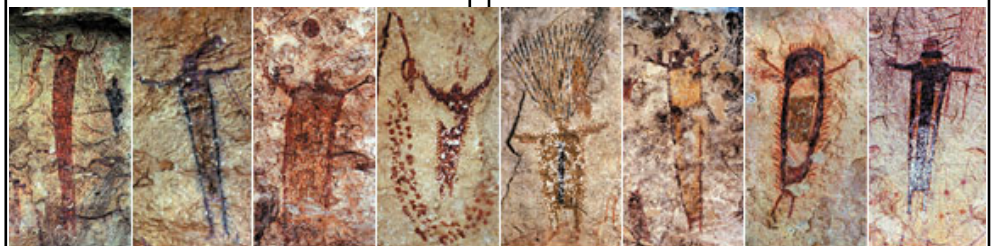

Shaken Baby Syndrome

September is Shaken Baby Syndrome and Child Safety Awareness Month. Plans are ongoing for the Child Abuse Prevention Co-Chairs and their committee to receive proclamations from Bell County and from the City of Killeen. In addition, Shaken Baby Syndrome brochures have been ordered to be delivered to local physicians and hospitals to help alert the public to the dangers of shaking a baby, even in play.

What is Shaken Baby Syndrome?

When a baby is vigorously shaken, the head moves back and forth. This sudden whiplash motion can cause bleeding inside the head and swelling that increases pressure on the brain, resulting in injury to the baby. This is known as Shaken Baby Syndrome (SBS). A baby's head and neck are susceptible to head trauma because his or

Changing the Beat

Step Forward!

Shaken Baby Syndrome

her muscles are not fully developed and the brain tissue is exceptionally fragile. Head trauma is the leading cause of disability among abused infants and children.

SBS occurs most frequently in infants younger than six months old, yet can occur up to the age of three. Often there are no obvious outward signs of inside injury, particularly in the head or behind the eyes. In reality, shaking a baby, if only for a few seconds, can injure the baby for life. These injuries can include brain swelling and damage; cerebral palsy; mental retardation; developmental delays; blindness; hearing loss; paralysis; and death. When a child is shaken in anger and frustration, the force is multiplied five or 10 times more than if the child had simply tripped and fallen.

HOW DOES IT HAPPEN?

Often frustrated parents or other persons responsible for a child's care feel that shaking a baby is a harmless way to make a child stop crying. Other times, children become victims when a parent or caretaker, not realizing how seriously this behavior can harm, throws a small child vigorously into the air, plays too rough, or hits an infant too hard on the back.
